## Terminals

- Add your terminals/locations to accurately represent your organization's structure.
- Each driver/employee can be assigned to a 'home' terminal.
- Users can be assigned to view a specific terminal/location, or have access to all terminals.

## Pulls

Depending on the frequency your company does random drug tests, tell dqm the frequency in which you want the list to be generated. dqm will automatically generate a list on your dashboard based on the percentage required to meet the standards of DOT.

- When combined with using one of our integrated partners, this enables ordering all tests with 1-click of a button.
- Enables streamlined results right back into dqm.

## Truckings

Save local trucking company/frequent past employer information here to make it easier for applicants to enter their previous employment history.

Applicants can't always remember their old employers' email and phone number off the top of their head, causing them to stop/pause the application. 'Truckings' enables dqm to pre-fill information when the applicant begins entering the employers name they can select them from the drop down list, and dqm will pre-fill the information to allow them to move forwards with submission.
