Pulls

In your company settings, you can set the frequency in which you want dqm to auto-generate a random driver list. dqm will auto-generate a list on your dashboard based on the percentage required to meet the standards of DOT.

-When combined with using one of our integrated partners, our customers are experiencing up to 50% time and money savings!!

DQM informing you there is a pulls list ready for your review and approval

Pulls	
Needs review	 3

Orders	
Requested	93
Scheduled	0
Processing	59
In Review	0
Completed	0

While reviewing the auto-generated list, make sure all drivers are active and expected to be on the list.

If you come across anyone that needs to be removed, you may use the red trash can icon, but you **MUST** list the reason **WHY** you are removing that individual.

DQM will instantly replace a 'removed driver' with a new one in order to satisfy the requirements set by DOT.

-When combined with utilizing one of our integrated partners, this feature enables ordering all tests with 1-click of a button, and streamlines completed results to come right back into dqm.

Order drug tests

Orders	
Requested	93
Scheduled	0
Processing	59
In Review	0
Completed	 8

From the dashboard you can track the lifecycle of these tests until completion.

You will be notified that a result has been returned to you by a notification in the 'completed' section.

Upon Admin review of the test result, dqm will automatically file the document in each respective driver profile.
